WN825G/GP and WPCI810G/GP 6.1.1 Firmware Release Notes

Compatibility

- The features in this release are compatible with the WN825G, WN825GP, WPCI810G, and WPCI810GP wireless adapters.

- Release 6.1.1 is compatible with all hardware versions.

- Release 6.1.1 supports Windows® 2000 and Windows XP™. Users with Windows® 98 SE and Windows ME®, use version 6.0.2

Changes in Release 6.1.1

- Cisco® LEAP®, Cisco® Client eXtensions (CCX) v1.0, v2.0, and v3.0–supported

- Windows® Help–enhanced online help for Motorola Wireless Configuration Utility

- WMM (Wi-Fi® Multimedia)–supported

- WPA2™ (Wi-Fi Protected Access version 2)–supported

- Added capability on the Motorola Wireless Configuration Utility allows users to import and export preferred network profiles

Known Limitations

- When a WN825G notebook adapter is used on a laptop with multiple card slots, a unique profile can be maintained for each slot. If only one profile is to be used, always connect the adapter to the same slot; otherwise, the adapter needs to be configured for each slot.

How to Upgrade

To upgrade to version 6.1.1:

1 Download and save the 6.1.1 Software Update **WN825_WPCI810_6.1.1.exe** from the Motorola Web site at the following link:

http://broadband.motorola.com/consumers/support/default.asp

2 Double-click the **WN825_WPCI810_6.1.1.exe** file you just saved and follow the on-screen instruction.

3 Restart your PC when Windows prompts you.

If You Need Help

If you need assistance while working with the WN825G, the WN825GP, the WPCI810G, or the WPCI810GP, call the Motorola Technical Response Center (TRC):

- Inside the U.S.: 1-877-466-8646

- Motorola Online: www.motorola.com/homenetworking (click "Support and Downloads")

The TRC is on call 24 hours a day, 7 days a week. In addition, Motorola Online offers a searchable solutions database, technical documentation, and low-priority issue creation and tracking.
